I have a field in Ticket.Problem.Partner in which I'm able to add several tagnames to form a tag cloud in the problem screen. This already works. I added a script to tag this fields, but now I want to add this tag to the detail in Ticket.Problem if, for example, the ticket contains a partner with the name 'Partner 1' The real script is: Ticket.Problem.Tag Cloud ticket.problem form To tag the field I use: But now I need to add:
