Each Color is created with clear pixels that are extremely light and semi-transparent. The same processes are applied to every single pixel. There is no chance of digital banding or moire when combined with different printing methods. Since all of my prints are created on acid free paper, these are technically some of the cleanest prints to ever be printed. In short, you can pretty much use any regular inkjet printer to print these. I suggest Epson inkjets, but any kind of inkjet will work. I also suggest using a printer without a fixed carriage
