FIFA is the best game on earth, and EA is the best publisher there is. But just how close is it to the real thing? On FIFA's newly revamped Career Mode, the question of how career mode really works is the real game changer. Fans and critics will soon find out whether the Mode is fun or just a glorified YouTube highlights reel and will also find out whether the game itself is fun or just a glorified YouTube highlight reel. But before that, let's take a look at FIFA 22's improvements. Football Finance The game's most controversial update may be the most impactful one in years. While the series prides itself on being a living, breathing sport simulation experience, there's a pretty definite divide between the hardcore, obsessive sports simulation sim players, and the casual casual masses. No matter what you think of the Madden series, the franchise's sports simulation history has earned its place in being a simulated career mode for millions of people. EA's Ian Livingstone has said that FIFA is the only sport simulation franchise that offers a career mode. And while you could make a case for being a FIFA mastermind, he's pretty right on. In FIFA 22, this has changed. The game's Career Mode now offers accurate and more thoughtful financial and career options, like a consistent career progression, customizing player moves, and even a full scouting interface that'll allow you to be notified about upcoming transfer windows. The game's central importance of a consistent and realistic career mode, on top of its season-long formats and leagues, is a big change. The career mode, in most respects, has been in a state of slow evolution for years, only adding important elements to earn the series' faithful fans. But that's about to change. There's a lot of other cool stuff in the game though that is thankfully not as closely scrutinized by critics or fans. Team Management The team that's most important to the popular management game franchise is the most important improvement in FIFA 22. Since its inception, one of the main appeals for The Sims franchise has been managing a town of housemates. The game has garnered over 12 million players while featuring something as simple as daily tasks and managing the Sims' diet. All the while, though, fans have been waiting for some of the finer nuances to be present. The takeaway is that it's now easier to upgrade your team and build a custom squad of
