It has a visual magnitude of +6.5 and a diameter of around 54 light-years. The luminosity of M47 is 2,000,000 times that of the Sun, equivalent to 0.08 times as much light. Its physical properties indicate that M47 is roughly seven billion years old, and formed at a redshift of $z = 0.2$. It is one of the most metal-rich globular clusters known. The metallicity of M47 is about 0.44 times that of the Sun. In 1979, an X-ray source was found in M47. Its nature as a cataclysmic variable (a coronal mass ejection) has been confirmed. It has a mass accretion rate of 1.5 times $10{-8}$ M☉/yr. Why is the free version of the service so limited?Â .Effects of selective adenosine A1 receptor antagonism on postinjury gastric secretion, gastrointestinal motility, and the quality of life of patients with healed ulcers. The authors evaluated the effect of adenosine A1 receptor antagonism on healing of previously healed ulcers. Gastric secretory output, gastrointestinal motility, and patient quality of life were assessed for 4 weeks in 52 patients with healed ulcers randomized to receive 40 mg of the A1 receptor antagonist 8-cyclopentyl-1,3-dipropylxanthine (DPCPX) at bedtime or placebo. The percentages of patients with adequate ulcer healing, adverse effects, and quality of life deterioration were similar in both groups. Median times for return of normal gastric acid secretion and gastrointestinal motility were 72 and 83 days in the placebo group and 56 and 84 days in the DPCPX group, respectively. DPCPX had no negative effect on the healing of previously healed ulcers or on the patients' quality of life.Q: How to pass parameters of dynamic type on iOS? I'm making my first iOS application.
