â€“ The Teacher s Book is the basic text book / textbook. In the beginning... When I started writing for AppsFlyer, a couple of years ago, I was mostly focused on the GDPR aspect of the new EU regulations. Apart from certain internal activities, our main focus was to build a tool that would allow users to easily understand how businesses can be affected and how they can easily react to the coming change. My head has since branched out a lot, and all of the below examples were created using AppsFlyer and its SDKs. I'll start with a screenshot from one of my first projects (titled simply 'Video') showing the road that we have made along the years to this point: I don't know whether it's the best UX. Personally I tend to like the horizontal action bar, but if you insist on the vertical one, I guess you'd agree with me that this is a great way to better organize your app's content, at least if you want to keep it manageable. In any case, I think it is important to remember that we have been developing this app for over two years at this point. In the box to the right, you can see that the supported languages for the app are: Arabic (both simple and advanced) Hindi Spanish Portuguese (Brazilian) Czech Tibetan Obviously some languages have more than one and in some cases we also support multiple variants. As you can see, the app content is placed in a big box with images and texts that refer to the respective language versions. You have probably seen apps like that in the past. Usually, your apps contain a main screen with a couple of buttons on the top left corner. Each of them leads to another screen. A screen that usually contains a text or a list of items. Different design choices in terms of UI Don't forget to change I like to use stories to understand what users are going to do in an app. It's a good way of visualizing what they are likely to do and why. Now let'
