

Take Your Basketball Gaming to the Next Level with Basketball Hoop LED Strip Light!

Are you planning to play basketball with your friends or family at night? Take your experience to the next level with Rubens' [Basketball Hoop LED Strip Light](#)! The colorful hues will surely add sparkle, lighting up your game. These Hoop LED Light Strips are mainly for lighting up the rim and background.

Sensor Activation

With every shot, the 144 LEDs on the rim strip of the Basketball Hoop LED Strip Light glow in excitement. It's because of the built-in sensor activators this amazing light comes with!

Different Light Modes

It has eight different light modes for providing optimal light output variety. Solid light, Mixed of all modes, Single-sided light flashes four times, All light bulbs fade in and fade out, The lights on both sides flash (4 shifting modes), etc., are some of the modes you can select.

Long-Lasting Battery

These rim lights use four AA batteries to light up hop for continuous 30 days of shoots. Want to turn them off? Detach the detachable battery case from the sensor and enjoy regular gaming without lights.

Durable and Weather Resistant

Don't consider it an ordinary LED light strip, as this one is resistant to temperature, moisture, precipitation, and even UV rays. Its durability can make it stand out both the extremes, scorching sun heat and pouring rain. Don't hesitate while taking hard shots, as it's crack-free.

Easy to Install

Just zip-tie the LED strip around the rim of your basketball hoop. Velcro the sensor case behind the backboard and the sensor box under the rim. Enjoy!

Wrapping Up

Get your hands on the Basketball Hoop LED Strip Light and light up your game with every shot!
