

Take Care of Your Imitation Jewellery: Do's and Don'ts of Caring Your Jewellery for a Longer Time

Whether it is gold or [CZ Imitation Jewellery](#), all jewellery needs some care and attention to look sparkling like always.

Imitation Jewellery is not made of precious stones and metals like gold, silver, platinum, etc. Taking good care of any type of jewellery, whether it is real jewellery or any fashion jewellery, make it save for a longer time.

When it comes to [Meenakari Imitation Jewellery](#), it is more chances of damaging it in comparison to original jewellery. Therefore, it becomes more difficult to take care of this jewellery as you want to wear it for years.

So, today here we have mentioned some tips to care for your jewellery.

Tips to Take Care of Your Imitation and Artificial Jewellery

Imitation or [Artificial Jewellery](#) adds up to your never-ending appeal and provides an eloquent look. In the case of fashion jewellery, most of the time we ignore the care of it and leave them for tarnishing. Let's know some tips to take care of the jewellery.

Store Your Artificial Jewellery in Air Tight Box

If you want your fashion jewellery to always look like a new one, keep it in an airtight box. This way, your fashion jewellery does not tarnish or break off. Many women benefit from this tip and make their jewellery last longer.

Never Forgot to Remove Your Jewellery before Going for Bath

Whether it is gold, artificial, imitation or [Customized Jewellery](#), if you want to avoid rusting before going for a bath, washing dishes, or any other water-related work, remove jewellery.

One of the most significant rules to keep your jewellery like a new one is to avoid contact with water while wearing jewellery as it can cause a change in your metal colour.

Keep Your Jewellery Away from Skin Care Products

Whether you buy your [Imitation Jewellery](https://www.cierojewels.com) Online or offline, always put your jewellery after wearing clothes and doing your hair and makeup. This will help your jewellery get jumbled with your clothes and protect them from your skin products.

Similarly, when you change your outfit or remove your makeup, take off your jewellery first. These small efforts will protect your jewellery from getting tarnished.

Pick the Tools

For cleaning the jewellery, the right tools are better for cleaning it. Don't use the usual cleaner to clean your fashion jewellery. Instead, use baby shampoo and lukewarm water to clean it.

Always Know How to Clean Your Jewellery at Home

For cleaning the jewellery at home you don't need any special jewellery cleaner or polish, but simply a soft cloth and some easy tricks. However, because each metal is different, it means that each of them requires different things for cleaning.

Gold Jewellery

For cleaning [Gold Jewellery](#), mix a few drops of mild, safe washing-up liquid and some warm water. Keep the jewellery for 15-30 minutes, then gently scrub with a soft toothbrush. After it, lightly dry it with a soft cloth and keep it completely dry before wearing it.

Silver Jewellery

While cleaning [Silver Jewellery](#), use a mixture of baking soda. Keep the jewellery for 15-30 minutes in this mixture. After using this, wash the jewellery with warm water, rub it with a soft cloth and keep it for drying.

Imitation Jewellery

Try to clean your fashion jewellery with a soft cloth or a toothpick to take out particles that are stuck in corners and splits. If your jewellery is losing its colour and turning green, you can use vinegar or one part of warm water with lemon juice. Then clean it with toothpaste, wash it again with warm water and dry it with a soft cloth.

However, if your fashion jewellery consists of duplicate stones, avoid using these chemicals on them.
